Projects

Oasis Hotel Website ⧉

Description: Developed a modern, interactive website for The Wild Oasis, a luxury hotel. We utilized Server-Side Rendering (SSR) to improve performance and SEO, ensuring fast load times. The site offers a seamless user experience with dynamic content and real-time updates.
Technologies: Next.js, Supabase, Tailwind,
GitHub Link ⧉

Oasis Hotel Dashboard ⧉

Description: Hotel management dashboard with real-time data updates, interactive charts, detailed reservation and guest management, and a user-friendly interface.
Technologies: ReactJs, Styled Components, React Hook Form, React Query and Supabase, Recharts
GitHub Link ⧉

Home Service Appointment

Description: The Home Service Appointment project is a Next.js platform using SSR for easy booking and management of home services like cleaning and repair. It features a user-friendly interface, real-time scheduling, and a responsive design for all devices. Additionally, a React Native version is available for mobile users.
Technologies: Nextjs, React Native, Expo, TypeScript, Tailwind, Firebase
GitHub Link for web version ⧉
GitHub Link for mobile version ⧉

Expenses Tracker

Description: A mobile application built with React Native to help users track their expenses efficiently. It provides an easy-to-use interface for adding, viewing, and managing expenses, ensuring users can maintain control over their financial activities.
Technologies: React Native, React Navigation, AsyncStorage, Expo
GitHub Link ⧉
